Grading preliminary study

Assessment Pre-study Master Thesis Project		
Criteria for grading	Weighting in %	Grade

Assessment Pre-study Master Thesis Project

- Die Vorstudie folgt einem einheitlichen, vorgegebenen Aufbau, der im Master-Thesis-Reglement beschrieben ist. Die Vorstudie soll im Kern sicherstellen, dass das Master-Thesis-Projekt gute Erfolgschancen hat.
- Die inhaltliche Beurteilung der Vorstudie folgt den untenstehenden 12 Leitfragen. Der Referent/die Referentin bewertet die Leistung für jedes Kriterium auf einer Skala von 1 («trifft überhaupt nicht zu») bis 10 («trifft voll und ganz zu»). Die Bewertung wird kurz begründet.
- Die Vorstudie muss mindestens mit der gerundeten Note 4.0 bewertet werden, um zu erfüllen.
- Bei der Bewertung der Vorstudie mit einer gerundeten Note 3.5 haben die Studierenden die Möglichkeit, die Vorstudie zu überarbeiten, um die erste Leistungsbewertung auf die Note 4.0 zu verbessern. Die Überarbeitung muss im Rahmen des Zeitplanes des laufenden Master-Thesis-Projekts möglich sein.
- Für Studierende mit einer Bewertung von unter einer gerundeten Note 3.5 besteht die Möglichkeit, die Vorstudie zu einem neuen Thema im nachfolgenden Semester zu wiederholen.
- Der Referent/die Referentin führen mit jedem Kandidaten/jeder Kandidatin ein Feedbackgespräch. Das vorliegende Beurteilungsraster bildet den Gesprächsleitfaden.
- Die Vorstudie wird mit 6 ECTS-Punkten gewichtet.

Overall evaluation

Practical relevance:

Is there clear evidence that the project is relevant for an applied field?

Comment Supervisor / Co-examiner: The relevance of the topic is well outlined in the first sections. However, the problem statement and motivation is too close to the research article by... Weiterlesen ›

1 × 6,0

Topic definition:

Is the topic properly defined and reasonably scoped?

Comment Supervisor / Co-examiner: The topic of the thesis is clear and it makes sense to look at this in the context of a master thesis. However, the preliminary study only lists treatment... Weiterlesen ›

1 × 6,0

Research question:

Does the main research question relate clearly to the topic and is it formulated concisely?

Comment Supervisor / Co-examiner: The research questions are clearly defined and the author has own ideas how to analyze further outcomes (district magnitude, list positions). However,... Weiterlesen ›

1 × 6,0

Content:

Does the topic treatment focus clearly on the problem as defined?

Comment Supervisor / Co-examiner: The procedure is clear.

1 × 10,0

Use of methods:

Does the author clearly understand the methods for answering the research question or particular aspects thereof? Did the author choose the right methods for answering the main research question?

Comment Supervisor / Co-examiner: The thesis will apply a regression discontinuity design described in section "Initial Considerations Regarding Methodology". The RDD is not explained in... Weiterlesen ›

1 × 6,0

Data:

Does the author have access to the data needed for answering the research question(s)? Does the author understand how to use this data?

Comment Supervisor / Co-examiner: The candidate has the relevant data and know the relevant data. However, he does not present any evidence about the data, only the total number of observations.... Weiterlesen ›

1 × 6,0

Tools:

Does the author clearly understand how to use the tools (software, hardware) with which to reach the objectives of the project?

Comment Supervisor / Co-examiner:

1 × 8,0

Candidate has good knowledge of Python and lists the relevant packages in the chapter "Technology, software and applications" . Most of these packages,... Weiterlesen ›

Project risks:

Have the main risks for completing the project been addressed? Does the author have a backup plan?

Comment Supervisor / Co-examiner:

1 × 8,0

Detailed list of project risks and respective mitigation strategies. Regarding the small sample: It is not clear what the candidate means with "fixed effects"... Weiterlesen ›

Plan:

Is there a reasonable plan, with interim goals, for doing the research and completing the project within the available time?

Comment Supervisor / Co-examiner:

1 × 8,0

Yes, the candidate provides a a detailed work plan in "Work Packages and Schedule" which seems reasonable to me. However, the specifics of the

Research literature:

Has the author clearly identified the materials relevant to the topic and has he or she gained an initial, rough overview of the literature?

Comment Supervisor / Co-examiner:

1 × 6,0

The preliminary study has not yet delved into the literature. The master thesis should have a solid theoretical background for both the main hypothesis... Weiterlesen ›

Formal standards: Does the Preliminary Study meet the generally accepted standards of form and style that apply to academic work? Comment Supervisor / Co-examiner: Language is fine, but the chapters and sub-chapters should be subsequently numbered.	1 × 9,0
Innovation: Does the Preliminary Study clearly indicate the author's original ideas that could result in innovation potential of the Master's Thesis? Comment Supervisor / Co-examiner: The author should be more specific why we are looking at Spain and why the incumbency advantage is Spain is something we should care about. He may also... Weiterlesen ›	1 × 9,0
unrounded grade Overall evaluation	1 × 4,5
unrounded grade Assessment Pre-study Master Thesis Project	1 × 4,5
Final grade Assessment Pre-study Master Thesis Project	4,5

Overall impression

Two main points need to be addressed in the final thesis: First, the hypotheses should come from the literature and should be better motivated. Second, the preliminary study does not explain how the author will implement the regression discontinuity framework. The respective Python packages are not mentioned. Other points are laid out above.
